- Barometer measures **Pressure**
- Voltmeter measures **Voltage**
- Lactometer measures Purity of **Milk.**
- Thermometer measures **Temperature**
- Anemometer measures **Velocity Of Wind**
- Richter Scale measures **Earthquake**
- Hygrometer measures **Degree Of Humidity**
- Sphygmomanometer measures **Blood Pressure**
- Geiger counter measures **Radioactivity**
- Pyrometer measures Surface **Temperature**
- Rain Gauge measures **Rainfall**
- Seismograph measures **Earthquake Recording**
- Ammeter measures **Electric current**
- Altimeter measures **Altitude**
- Anemometer measures **Velocity and Direction of Wind**

- Barometer measures Atmospheric Pressure
- Audiometer measures Improvement of Hearing Power
- Calorimeter measures Quantity of Heat
- Colorimeter measures Intensities of Colors
- Algesimeter measures Sensitivity of Skin
- Calorimeter measures Quantity of Heat
- Colorimeter measures Intensities of Colors
- Caffeine is the most important stimulant in tea leaves.
- Acid rain contains high level of Sulphuric and nitric acid.
- One gram of carbohydrates gives energy of the amount 4.1kcal
- A man can survive without food for at least one month.
- When a gas turns into a liquid, the process is called Condensation:
- Yeast used in making of bread is Fungus.
- The disease diphtheria affects the Throat in Human Body.
- Liquids that evaporate quickly are known as Volatile liquids.
- Spinach is a good source of Potassium.
- The most abundant element in earth's crust is Oxygen.
- In human body **Gall Bladder** is part of the Digestive system.
- Glaucoma is caused by increase in pressure within Eyeball.
- Enzymes are made of Proteins.
- One ounce is equal to 28.35 grams.
- Bamboo is Grass.
- Stomata are the tiny openings present on the epidermis of leaves
- Paleontology is the study of the history of life on Earth as based on fossils.
- Non-bird dinosaurs lived between about 245 and 66 million
- Years ago, in a time known as the Mesozoic Era.
- The diameter of the earth is 12,742 km.
- Mobile phone uses radio waves to transmit signals to a network of base stations
- The pH of pure water (H20) is 7 at 25 degree Celsius.
- The light-year is a unit of length used to express astronomical distances and is equivalent to about 9.46 trilion kilometers (9.46x 1012 km).
- The Energy possessed by water in a dam is Gravitational potential Energy.
- The Blood Glucose level reduced by Insulin.
- Influenza is caused by Virus.
- Acetic Acid is used for seasoning of Food
- Lipase enzyme bring about Hydrolysis of Fats.
- Ascorbic Acid is a water soluble vitamin.
- The disease diphtheria affects the Throat in Human Body.
- Spinach is a good source of Potassium.
- Insulin was discovered by Dr. F.G Banting.
- Citrus Fruits are considered rich in Vitamin C.
- Spleen is not an endocrine gland.
- An instrument designed for testing the purity of milk is called Lactometer.
- Autopsy is the Port-Mortem examination of a body.
- Red Colour has largest & Blue colour has shortest wavelength.
- Pomology is the study of cultivation of fruits.
- Logarithem tables were invented by John Napier.
- Most Commonly used bleaching agent is Chlorine.
- The Planet with the shortest year: Mercury

- ………… was the 2st mathematician who gave the concept of Set. George Cantor (b/w 1874-1884)
- Which is the biggest planet of the solar system in inner planets? Earth
- Which is the 2nd month of Islamic calendar? Safar
- Protective layer of Eye is? Sclera
- Plasma is the …………. State of matter? Fourth
- Histology is the study of Tissue
- Robert Hooke discovered cell from Cork
- end product of photosynthesis is Carbohydrate and oxygen
- Hydrogen has …….. type of Isotopes: 3
- Sum of proton & neutron is called Atomic Mass
- Ink shell no of electron: 2
- In Glucose no of Hydrogen is: 12
- Leibniz calculator wad developed in: **1971** (Gottfried Wilhelm von Leibniz (1646-1716) invented a calculating machine which was a major advance in mechanical calculating.)
- William Oughtred invented: Slide Rule
  two identical linear or circular logarithmic scales held together and adjusted by hand
- In very low temperature which from the following will freeze at last? Sea Water
- The nearest plant to the earth is? Venus
- The position of an element in the Periodic Table is determined by its ………. Number: Proton
- The Salinity of sea water is determined by the amount of common salt (Sodium chloride in ………. Of sea water: 01 Kg
- The Planet which is easily visible from the earth is? Venus
- The bodyguard of earth is ……….that save the earth from many comets and asteroids. Jupiter
- The planets visible to us without using a telescope are: 5
- Biosensor is used to measure? Blood glucose level
- The Principal constituent of the atmosphere of the earth isNitrogen
- How many divisions does Fahrenheit have? 180
- Speed of any object be changed by: Force
- Unit of Decibel is denoted by: dB
- Which particles of atom are not charged are called neutral? Neutron
- Kingdom of Monera deals with? Bacteria
- What is Eukaryotic Cell? Single Cell
- Plants make their own food by? Photosynthesis
- Animals with backbone are called? Vertebrates
- The body of fish is covered with? Scales
- Fishes take breath through their part called? Gils
- Reptiles lay their eggs on? Land
- Which insects are environment friendly? Earthworms
- Which plant have parallel leaf venation? Monocot
- Yeast is an example of? Fungi
- Which is main causes of ozone depletion? Air pollution
- What is the melting point of Ice? 0 degree c
- How many primary teeth are there? 20
- Lungs are protected by? Ribcage
- Asthma is main disorder of? Lungs
- Larva of butterfly is called? Caterpiller

- Frog eggs are also called? Spawn
- Flash of body is made up of? Protein
- Kwashiorkor disease is caused by deficiency of? Iron
- Human beings are: Omnivores
- Which are the only secondary consumers? Carnivores
- Animals that eat primary secondary consumers are called? Tertiary Consumer
- Solution is a kind of? Mixture
- The process of separation of solute and solvent from the mixture is called? Filtration
- Water is a? Compound
- The lowest temperature in laboratory thermometer is? 10 C
- Secondary source of history is: Books written about historical periods
- ………………. Are called wise humans. Neanderthal
- The origin of species book was published in 1859
- The revolution that started around 1769 is called Industrial Revolution
- Charles Darwin gave Theory Evolution
- Nature of water is Neutral
- Litmus paper show color in basic medium Blue
- Which one weak acid: Carbonic Acid
- Which best describes milk? Slightly Basic
- Which is strong base? Sodium Hydroxide
- Sodium chloride in solid state ……………. Electric? Do not conduct
- Orange Juice pH is? 4
- Which one is table salt? Sodium Chloride
- Molecular mass of ozone? 48
- Work is ………….. quantity: Scalar
- Unit of Power is Watt
- Useable form of energy is: Kinetic Energy
- Length b/w two particular points: Displacement
- Rate of change of velocity? Acceleration
- Unit of Charge is: Coulomb
- Image formed in the eye? Retina
- The message transfer from eye to brain Optic Nerve
- The relationship b/w living organisms with environments is: Ecology
- Tissue combines to form: Organ
- DNA is present in: Nucleus
- The Formula of Ozone layer is: 03
- Acid rain contain: H_2SO_4/H_2CO_3
- The Unit of Distance: m/s
- The storage form of Energy is: Lipids
- Lipids stored in the: Liver & Muscle
- In hair protein present that called: Keri Tin
- Protein made up of? Amino Acid
- The Amino Acid made of: Amino Group: Carboxylic Group
- CTRL +> key is used for Grow font:
- HQ of UNESCO is in: Paris
- The blood is: Tissue
- The some no of proton and different no of neutron: ISO Tope
- Similar atom joins to form: Element
- The unit of Velocity $\frac{m}{s}$

- The unit of weight: N
- The unit of Force: N
- The amino groups contains: Nitrogen & Hydrogen
- The work divided by time is called: Power
- Bacteria are: Decomposer
- The carbon react with oxygen is called: Combustion
- Tissue combines to form Organ:
- Toggle case is option of: Change case
- The pH of water is: 7
- The magnitude of earthquakes can be measured by: Seismograph
- The Chemical name of table salt is: Sodium chloride
- The speed of sound is………… the speed of light: Less
- Pandemic Covid-19 is …………… disease: Viral
- The lungs are …………………….. organs: Breathing
- Earth is surrounded by layers of gases collectively called: Atmosphere
- Similar body cells group together to form a: Tissue
- What energy emerges from motion? Kinetic Energy
- A single piece of coiled DNA is called: chromosome
- Plants need which gas to perform photosynthesis: Carbon dioxide
- Which nutrient plays an essential role in muscle building? Protein
- Animals that suckle their young one are called: Mammals
- Which material has the highest transparency: Glass
- Hydrogen gas is predominant in the sun.
- Solar System consist of eight planets.
- Vitamic- C protects skin of human body.
- Wood is main raw material for the manufacture of Paper.
- Jaundice affects the Liver in the human body.
- Enzymes are made of Proteins.
- The Acid prepared by Jabir Bin Hayyan is Sulphuric Acid.
- Velocity is a Vector Quantity.
- Biological death of a patient means death of tissues of the Brain.
- Cholesterol level is analyzed in Blood Sample
- Optical Fibre Sytem is a Telecommunication system.
- It is difficult to cook on mountains because of Low atmospheric pressure.
- The Process of photosynthesis in plants takes place in Leaf.
- The humidity in the air tells us about the ratio of water vapours in the Air.
- Mitochondria is called the power house of the cell.
- Phytoplankton are microscopic marine algae.
- There are two moons of Mars.
- Diameter of earth is 12,742 km.
- Liquids which evaporate quickly are known as Volatile.
- Troposphere is layer of atmosphere which lies close to earth.
- Hydrogen is used in making Ghee.
- Cornea is part of eye which can be donated.
- Hardness of water can be removed by adding Sodium carbonate.
- Accumulation of salts in kidneys results in Kidney Stone.
- RNA is principally involved in the syntheses of proteins.
- Sensory neurons carry message to brain and spinal cord.
- The pancreas is an organ located in the abdomen.

- Pancreas plays an essential role in converting the food we eat into fuel for the body's cells.
- Lithotripsy is medical procedure that uses shock waves or a laser to break down stones in the kidney.
- Mercury is the closest planet to the Sun.
- There is a hole in the Ozone Layer at South Pole.
- Chronometer is invented by John Harrison.
- Rain water is considered the purest form of water.
- Insulin is secreted in Pancreas.
- Spleen is not an endocrine gland.
- Blood cells are produced by Bone-marrow.
- The strongest muscle in the human body is in the Jaw.
- Cholera diseases occur due to consumption of contaminated water.
- Most astronomers believe that origin of the Universe is Big Bang Theory
- Hepatitis & Jaundice are disease of Liver.
- Creature having both male and female reproductive organs is known asHermaphrodite.
- A low are storm with high winds rotating about a centre of low atmospheric pressure is called cyclone
- The 1st Muslim scientist who presented the law of reflection and refraction is Ibn-ul-Haitham.
- The difference in the duration of the day and night increases as one move from equator to poles.
- Solar system was discovered by Nicolaus Copernicus.
- Richest source of Vitamin D is Cod Liver Oil.
- The substance that give away electrons is oxidized.
- Radioactive isotope of Uranium used in Nuclear Bomb is 92 U 235.
- Rectified Spirit is a mixture of ethanol (95.6%) and water produced as an zoetrope of distillation.
- Silicon makes up 27.7 percent of Earth's Crust; it is the 2nd most abundant element in the crust, being surpassed only by oxygen.
- One of the main function of the earth's ozone layer is to filter out Ultraviolet rays.
- A Light year is the distance a beam of light travels in a single Earth Year.
- When a light ray enters from air into glass, its wavelength decreases.
- An air bubble in water acts as a concave lens.
- Cobalt 60 is generally used in radiation therapy because it emits gamma rays.
- A thermos flask prevents the heat loss by conduction, convection and radiation.
- Fish is first class protein as it contains essential amino acid
- The unit of capacitance is Farad.
- Pacemaker is a small device that is placed in the chest to control abnormal heart beat.
- Vitamin soluble in water are Vitamin-B & Vitamin-C.
- Vitamin soluble in fat are Vitamin-A, Vitamin-D, Vitamin-E and Vitamin-K
- Water Gas is a mixture of Carbon Monoxide and Hydrogen
- Most of the weather disturbances take place in troposphere.
- Auto analyses is use to examine glucose, urea and cholesterol
- The iron compound found in hemoglobin as haematin.
- A goniometer is a device that measures an angle or permits rotation of an object to a definite position.
- Lithium is the strongest reducing agent.
- Aqua Regia is mixture Of one part 0t concentrated nitric acid and three parts of concentrated hydrochloric acid.

- The speed of revolution Of Earth round the sun is maximum when Earth is **nearest to the sun.**
- A **bolometer** is a device for measuring the power of incident electromagnetic radiation.
- **Transformer** is device used to step up or step down the voltage.
- **Cadmium** being a good absorber of neutrons is used as a controller in nuclear reactor.
- **Ribosome** is called the factory of protein:
- **Gluten enteropathy** is the inability to Absorb gluten, a protein found in wheat,
- Titanium is called the **metal of future.**
- Thermal decomposition of alkanes in the absence of air is called **Cracking**
- **Fuse wire** is made of lead and tin alley
- Radio waves are reflected from **ionosphere.**
- **40° C and-40°** F exhibit the same temperature.
- **Hormone Melatonin** is secreted by Pineal body.
- **Vitamin-K** is synthesized in our large intestine by the bacteria and from there it is absorbed.
- **Electro Cardiograph (ECG)** is used to find the abnormality of heart
- Rocket propulsion is based on the conservation of **linear momentum.**
- The velocity of escape from Earth's gravitation into space is **11.2 km/sec.**
- **Luna-II** was the first spaceship to land on moon.
- The average density on Earth is **5.5 cubic centimeter.**
- Soap decreases the **surface tension** of solution hence clothes get cleansed.
- The British physicist who is generally regarded as the Discoverer of the electron, the proton and the neutron is Sir **Jospeph John Thomson.**
- Velocity of light, amplitude and wavelength changes in refraction of light but **frequency remains unchanged.**
- **Pitch of sound** is determined by its frequency.
- **Longitudinal waves** can't be polarized.
- **Refractive index** of red light is **lesser** than the refractive index for violet light.
- **Atomic bomb** is based on nuclear fission.
- **Lysosome destroys** itself such a process so it is called **suicide vesicle (bag)** of the cell.
- **Chloroplast** is called Kitchen of cell.
- **Ribosome** is called the factory of protein.
- Most of the **weather disturbances** take place in troposphere.
- **Goniometer** is used to measure the angle of the crystal.
- **The speed of revolution of Earth** round the sun is maximum when Earth is nearest to the sun.
- A **bolometer** is a device for measuring the power of incident electromagnetic radiation.
- An air bubble in **water acts as a concave lens.**
- Titanium' is called the **metal of future.**
- Steel is used for making **permanent magnets**,
- **Transformer** is device used to step up or step down the voltage
- **Thermal decomposition of alkanes** in the absence of air is called **Cracking.**
- The Chemical element with the **lowest melting point** is **Helium** and the element with the highest melting point is **Carbon.**
- Hansen's disease is commonly known as **Leprosy.**
- Penicillin was discovered by **Alexander Fleming.**
- The part of the human body known as the mandible is **Lower Jawbone.**

- The French microbiologist who discovered the process of pasteurization was **Louis Pasture.**
- The rarest blood type is **AB- (Negative).**
- The main structural molecule in hair and nails is **Keratin.**
- **Fuse wire** is made of **lead and tin** alloy.
- A **transformer** works on the principle of electromagnetic induction. It brings abouta change in the potential of an alternating current.
- **Lithium** is the **strongest reducing agent.**
- Uranus takes **84 years** to complete one revolution round the Sun.
- **Methyl alcohol** (CH30H), is also called wood alcohol, or wood spirit.
- **Radio waves** are reflected from **ionosphere.**
- Lack of proteins Causes **kwashiorkor** and **Marasmus** disease in children.
- **Kwashiorkor**: In this disease, hands and legs of children get slimmed and the stomach comes out.
- **Marasmus:** In this disease, muscles of children are loosened
- The ozone layer protects the earth from the **Ultraviolet rays** sent by sun.
- Carbohydrate content in potato (per 100g) is **20.3g,**
- The ozone layer is present in atmosphere above earth, the stratum of atmosphere in which ozone layer is **Stratosphere.**
- Pakistanis receive the largest dose of ionizing radiation from **Natural sources.**
- In water pollution, industries are said to be the **Point Sources**
- The gas associated with global warming is **Co_2**
- **Liquid Ammonia** is commonly used in cold storage in Pakistan.
- Mango variety having strong flavor is **Langra**
- Richest source of Riboflavin is **Bael.**
- The gas used for artificial ripening of green fruit is **Ethylene.**
- The closest planet to Earth is **Venus.**
- Sulfuric acid was prepared by **Jabir bin Hayyan.**
- The name of disease called Lockjaw is **Tetanus.**
- The longest and largest bone in human body is **Femur.**
- Sonar is used to measure **Ocean depth.**
- The branch of Physics which deals with atomic nuclei is called **nuclear Physics.**
- Stone used in whitewash **Stonelime.**
- Titanium is called the **metal of future.**
- Cobalt-60 radioactive isotope is **used to control Leukemia.**
- Uranus takes **84 years** to complete one revolution round the sun.
- **Oxygen** was discovered by Joseph Priestley in 1774
- Thermal decomposition of alkanes is called **Cracking.**
- The chemical element with the lowest melting point is **Helium**
- Fuse wire is made of **lead and tin.**
- Methyl alcohol (CHYOH) is also called **wood alcohol,** or **wood spirit.**
- **Cresco graph** is an instrument used in recording growth of **plants**, invented by **Dr. J. C. Bose. Grows**
- Light radiation is both of wave and particle nature.
- An air bubble in water acts as a concave lens.
- The **colors** in thin films of soap bubbles are seen due to **interference of light.**
- When a light ray enters from air into glass, **its wavelength decreases.**
- Steel is used for making **permanent magnets.**
- Lenz's law is based on **energy conservation.**

- Transformer is used for stepping up or stepping down the A.C voltage.
- Cadmium being a good absorber of neutrons is used as a controller in nuclear reactor.
- Cobalt 60 is generally used in radiation therapy because it emits gamma rays.
- Infinite images of an object are formed that is placed between two parallel mirrors.

Geography

- World's largest coffee producer is Brazil
- In Pakistan iron ore is found in Kalabagh.
- The aborigines of North America are called Red Indian.
- Khartoum lies on the Nile River.
- Diego Garcia is an island in Indian Ocean.
- Panama Canal is busiest ocean trade route.
- Greatest Land mountain range is Himalaya.
- Largest Ocean is the Pacific Ocean.
- Smallest Ocean is the Arctic Ocean.
- Largest Gulf is the Gulf of Mexico.
- Largest Active Volcano is Mauna Loa, Hawaii, USA.
- Rivers Carries the maximum volume of water is Amazon.
- Largest Fresh Water Lake is Lake Superior.
- Country with Shortest Coastline is Manaco.
- Country with largest coastline is Canada.
- The person in Space is Yuri Gagarin.
- First lady who climbed on Mount Everest was Junko Taibi.
- 1st man to walk in space is Alexei Lenovo.
- Least Populous country is State of Vatican City.
- Smallest Islamic Country Maldives.
- Most Populous Islamic Country Indonesia, (Largest Kazakhstan)
- Greenwich situated near London.
- Red Sea is an example of a Rift Valley.
- The Elastic-rebound theory deals with Earthquakes.
- Ionosphere layer of atmosphere is vital for telecommunications.
- Nimbostratus clouds likely to cause heavy rainfall.
- Warm air tends to rise up through cold air because the air is less dense.
- An iceberg is a floating mass of ice.
- Organisms that live on the ocean bottoms are Benthos.
- The grassland of Asia is Called Steppe.
- Fastest Planet is Mercury.
- Planet closest to sun is Mercury.
- Hottest Planet is Venus
- Largest land mountain range is Andes S. America
- The Deepest Lake in the world is Lake Baikal.
- World Highest waterfall is in Venezuela.
- Largest Lake is The Caspian.
- Hottest Place in the world is Death Valley.
- Brightest planet is Venus.
- Planet with most satellites Saturn.
- World's Highest waterfall is "Angel"
- Coldest place in the world is in Vostok in Antarctica.

- Longest glacier is "Lambert Glacier"
- Largest desert is Antarctica (According to definition of desert)
- 2nd Largest desert is Sahara Desert

FIA

Assistant Sub Inspector

Held on 22-09-2019

Compiled by: Zahid Hussain Mirani
WhatsApp No: 0308-2022235

Professional Part FIA Related Questions

- According to FIA Rules Council Means? Federal Anti-Corruption Council
- Federal Investigation Agency (Inquiries & Investigations) Rules were enforced in?
  Ans: 2002
- Subject to Rule 5, sub-rule (2), a criminal case shall be registered against an accused public servant of BPS 13-17 and equivalent with prior permission of?
  Ans: Director General
- Who shall be chairman of Federal Anti-Corruption Council? Secretary
- According to FIA Rule No 10 (2) in case registered against Officers working in BPS 20 and above, explanation of accused officer, giving him ……….. time shall be obtained by the Director General. 15 Days
- Who shall act as secretary of Federal Anty-corruption council? (FACC)
  Ans: Director General of FIA
- Who Shall be competent authority in cases where senior public servant is involved along with junior public servant?
  Ans: Competent Authority for the public servants in the highest rank involved in case
- Inquiry against accused Public servant of BPS 1-12 and equivalent shall be initiated with prior permission of? Ans: Deputy Director
- According to FIA Rule no 10 (2) questions asked and replies furnished by the concerned by the concerned officer shall be invariably be incorporated in?
  Ans: Confidential Final Report
- Section Officer Means? Ans: A Officer who is in direct in charge of the Section
- Who may initiate verification of a complaint in order to ascertain the identity of the complaint or informer and genuineness of the complaint & Information

Ans: The Deputy Director, An officer above the rank of Diretor

- ★ Federal Investigation Agency (Inquiries & Investigations) Rules contains ………… rules in total. Ans: 11

English Part

- ★ Synonym of **LETHARGY:** Laxity
- ★ Antonym of **APPLAUD:** Censure
- ★ Synonym of **EMACIATED:** Very Thin
- ★ Synonym of **VITUPERATE:** Abuse
- ★ Synonym of **PRECARIOUS:** Unsafe
- ★ Synonym of **DELEGATE:** Representative
- ★ Antonym of **RESTITUDE:** Goodness

Islamic Part

- ★ Identify the last **Ghazwa** in which the Prophet SAW **participated:** Tabuk
- ★ **Largest Surah** of Quran: Al-Baqrah
- ★ Name the Prophet whose wife did not **believe** in Islam? Loot
- ★ The Angles, who are **incharges** of **graves & initial accountability:** Munkar & Nakir
- ★ Total **Makki** Surah? 86
- ★ How many **verses** of Surah Alaq **revealed** first time on the Holy Prophet SAW? 5
- ★ In which Ghazwa **Abu Jahal** was **killed**? Badar
- ★ **Commander** of infidels in battle of Uhad? Abu Sufyan
- ★ Name the **2nd Kalima?** Shahadat
- ★ **Abdullah bin Ubay** was a? Hypocrite
- ★ Surah without **Bismillah?** Surah-al-Tauba
- ★ **First Islamic** month: Muharam
- ★ **Last Surah** of Quran? Surah Al Nas
- ★ What is meant by Allah's Attribute **Al-Bari?** The Maker
- ★ Who narrated most of **Ahadis** among the **Sahabas**? Abu Huraira
- ★ Surah which have **two Bismillah's?** Al-Namal
- ★ Treaty **of Hudaibia** was signed on? 6th Hijra
- ★ The **largest army** that ever marched out of Madina was **consisted** of: 30.000
- ★ **Miraj Shareef,** the event occurred on: 27 Rajab

General Knowledge/ Pakistan Study Section

- ★ **Youngest Mountain** range on the earth? Himalayas
- ★ ……… was the **1st state** joined Pakistan in **1947**? Bahawalpur
- ★ In **1969**…………….. Joined Pakistan? Swat & Chitral
- ★ **Nanga Parbat** is the part of? Himalayas
- ★ **National Flower** of Pakistan? Jasmine
- ★ When **National Action Plan** was launched by **Government**? December 2014
- ★ **Benazir Bhutto** was **assassinated** on? 27th Dec, 2007
- ★ In **1966,** construction of ……………. Was completed? Islamabad
- ★ **Quaid** Resigned from **congress**? 1920
- ★ In …………… **Azad Kashmir** Got Independence? Oct, 1947
- ★ **K-2** is also known as? Goodwin Austin
- ★ Pakistan bought **Gwadar** from **Oman** in? 1958
- ★ The **salt range** is situated b/w river soan &? Jhelum
- ★ Area of **Azad Kashmir?** 13,297
- ★ **National Game** of Pakistan? Hockey
- ★ On **19th march 2008,** the National Assembly elected **1st women** speaker? Fehmida Mirza

- **Harrapa** is situated in? Sahiwal, Punjab
- Pakistan is divided into how many **physiographical divisions**? 6
- On **30th Sept, 1947**, Pakistan become the **53rd** Member of? UNO
- Pass **connect** with Dera Ismail Khan & Ghazni? Gomal Pass
- The **computer language** written in only two numbers 0 & 1 is called: Binary Number
- Aquatic **Animals** breathe in water through? Gills
- In which country city of **Venice** is situated? Italy
- When **UNO Charter** was signed? 26th June, 1945
- An animal that has ability to eat and survive on both **plant & Animal?** Omnivore
- **Cascade** is a mountain range situated in which **continent**? North America
- Largest **crude oil** producer country? Antioxidant, Protection of Cell walls
- Our body needs **Vitamin E** for? Antioxidant, Protection of Cell walls
- **Ernest Hemingway** is known for?

A Farewell to Arms, Winner take nothing, The Old man & the sea

- Indian PM **Narendar Moodi** belonged to which Party? Bharatiya Janato Party
- A **time period** in which earth completes a day is called? Axis
- Where **HQ of UNO** is located? New York City
- Which of the following does not include **atmosphere**? Magnetosphere
- How many **landlocked** are in Asia? 12
- What is **Echo-meter**?
  An apparatus for measuring depths of objects in water or underground by timing the echoes of sound reflected from them.
- Which countries does border with **Turkey**? Kazakhstan
- The "**Helmand Province**" of Afghanistan, is famous for cultivation of? Opium
- Who **invented** electrical light bulbs? Thomas Edson's
- When India's mission to moon **Chandarayaan-2** Failed? 7th Sept 2019
- Capital of **Austria**? Vienna

General Knowledge

- He decided to dress in gray suit in order to be…………… **Inconspicuous**
- **Nonchalant** is most dissimilar to: **Concerned**
- Novel is **dissimilar** to: **Old**
- **"The Daily Dawn"** was started in **1941** from: **Delhi**
- …………. Is the largest peninsula of the world: **S. Arabia**
- ……. River is passing through the Washington: **Potomac**
- **Ryder cup** is a famous trophy for sports: **Golf**
- ………. Is the current **S.G** of **OIC**: **Dr. Yousif Bin Ahmad**
- Received **emails** come in which folder: **Inbox**
- Excel Index Function: **Returns the value at given position in A Range or Arry**
- Increase the font in size in word shortcut key: **CTRL+]**
- If you want to repair software bug. It is available on internet free of cost is called: **Path**
- Which is the **font size** available in ms word font size tool in formatting tool bar? **8-72**
- MS word 2007 can maximum **zoom** in a document: **500%**
- Protocol which assigns IP Address to client connected to internet is: **DHCP**
- What is the name of the program that is specifically made for **email checks**: **Outlook express**
- Which file type cannot be attached with email: **exe**
- In which of the following Act providing for the safeguard of minorities: **Act of 1955**
- Name the person who look over after the dismissal of Khawaja Nazim-Ul-Din: **Muhammad Ali Bogra**
- The most important feature in the economic measures perused by Alaud-din-Khilji was: **Market Control**
- The Indian States that were annexed by invoking the Doctrine of Lapse included: **Jhanj, Nagpur, Satara**
- How many Muslim Leaders were included in Simpla Deputation: **35**
- 2nd G.G of Pakistan: **Khuwaja Nazim Ul Din**
- The British albtude for granting independence to India changed b/c of:
  Impact of 2nd World War
  Change in the Government of Britain
  Rising tide of nationalism
- Last viceroy of India: **Lord Mountbatten**
- Who will be the head of Tehsil Government: **Union Nazim**
- Yousif Raza Gillani took the of office of PM from Parvez Musharaf on: **25th March2008,**
- When was MOA college established in Aligarh: **1875**
- Two nation theory for the 1st time was introduced by: **'Sir Syed Ahmed Khan**
- When & Where did Nawaz Shareef meet the Indian PM Narendar Moodi? **27th May 2014, Delhi**
- The Great Bath of the Indus Valley Civilization was discovered in: **Mohen-jo-Daro**
- Sir Syed Set up Muhammadan Educational Conference in 1866 with the main objective of: **Suggest Modern Techniques for educational improvements:**
- During whose viceroyalty, Queen Victoria was crowned the Kaiser-i-Hind in Delhi Duration: **Lytton**
- PLO Stands for: **Palestine Liberation Organization**
- Which one of the following is not a form of precipitation: **Fog**
- In which region Bangladesh is situated: **South Asia**
- The Heaviest Rainfall is recorded in: **Equatorial Regions Tropical Mountain Areas**
- NRA Stands for: **Nuclear Regulatory Authority**
- ADC stands for: **Agriculture Development Corporation**
- In which type of rocks are coal & Petroleum found: **Sedimentary Rock**

- Tafseer-Al-Dur-ul-Mansoor is written by: **Imam Jalal-Din Suyuti**
- Wine was declared Haram in: **5th Hijra**
- Fatwa Qazi khan is authentic Fatwa of: **Fiqh Hanafi**
- What is meant by Ijma: **Agreement of Ulama**
- How many camels render is to pay Zakat? **5**
- The Author of Al-Hidaya: **Burhan Ul Din**
- Hazrat Umar RA embraced Islam: **616 AD**
- What is the full title of Tafseer-e-Ibn-e-Kaseer? **Tafseer Quran Azeem**
- Who Established Department of Police: **Hazrat Umar RA**
- In which surah of the Quran are the details of Heritage: **Surah Nisa**
- Azan for prayer was adopted in: **1st Hijra**
- How many Surah/Chapters of the Quran are named after the names of animals: **6**
- When 1st Namaz of Eid-ul-Fitir was offered: **1st Shawal 2nd Hijra**
- How many goats render to pay Zakat: **40**
- In the beginning of Holy Prophet SAW worked as a shepherd for: **Banu Saad**
- Battle b/w Taloot & Jaloot is described in which Surah of Al Quran: **Al Baqra**
